

# AELITIUM Product Preview

## Datadog for AI Agents with GPG Audit Trail

Version 1.0 | October 2025

### 1. The Problem

AI agents in production **resolve incidents...** but without **auditable proof**.

**Enterprise Reality:** - Agents make critical decisions (pricing, customer support, compliance)  
- No forensic trail of **why** a decision was made - Regulators (EU AI Act) demand **technical traceability** - CIOs need **evidence**, not “LLM magic”

**Risk Exposure:** - Reputational damage from unexplained AI failures - Regulatory fines (up to €30M under EU AI Act) - Inability to debug complex agent interactions - No human oversight checkpoints

### 2. The Solution: End-to-End Incident Management

**AELITIUM = Datadog for AI Agents + Cryptographic Proof**

#### User Journey (5 Steps)

#### What Happens

1. **Incident:** Service latency spike detected (P1)
2. **Ω-OPS Agent:** Runs infrastructure probe □ confirms degradation
3. **Orchestrator:** Executes repair pipeline:
  - `sigma.analyze` □ Root cause analysis
  - `pragma.evaluate` □ Policy compliance check
  - `sigma.publish` □ Apply fix
4. **Stewards:** Human approves critical action (compliance requirement)
5. **Audit Bundle:** GPG-signed manifest with full decision trail

### 3. Proof: Live System Screenshots

#### Dashboard: Real-Time KPIs

AELITIUM Dashboard	Status: ACTIVE
<div>▣ Agent Actions (Last 30 min)</div> <div>└ Σ-CTO (QA): 3 successful</div> <div>└ Ω-OPS (Probes): 12 successful, 1 degraded</div> <div>└ Φ-SEC (Scans): 1 successful</div>	
<div>▣ Orchestrator Jobs</div> <div>└ Running: 2</div> <div>└ Completed: 47 (24h)</div> <div>└ P95 latency: 1.2s</div>	
<div>▣ Steward Approvals</div> <div>└ Pending: 3</div> <div>└ Approved: 28 (24h)</div>	
<div>▣ Audit Trail</div> <div>└ Last Bundle: 2025-10-20 11:23 UTC (SIGNED ▣)</div>	

#### Ω-OPS Probe Results

```
{
  "agent": "omega_ops",
  "action": "probe_infra",
  "status": "degraded",
  "endpoints_up": 4,
  "endpoints_down": 1,
  "results": [
    {"endpoint": "API Health", "status": "up", "response_time_ms": 14},
    {"endpoint": "Prometheus", "status": "up", "response_time_ms": 8},
    {"endpoint": "Loki", "status": "down", "error": "connection refused"}
  ]
}
```

#### Orchestrator Pipeline Execution

Job ID: 8f2a3b4c-5d6e-7f8g-9h0i-1j2k3l4m5n6o

Status: completed

Steps:

[▣] sigma.analyze (620ms) → Root cause: Loki disk full

```
[ ] pragma.evaluate (45ms) → Policy: APPROVED (risk: medium)
[ ] sigma.publish → WAITING STEWARD APPROVAL
```

## Stewards Approval Interface

STEWARD APPROVAL REQUIRED
Request ID: req_3f2a8c9d Domain: sigma Priority: HIGH Summary: Deploy disk cleanup + restart Loki
Risk Assessment: <ul style="list-style-type: none"><li>Impact: Medium (5min downtime for logs)</li><li>Blast radius: Monitoring only</li><li>Rollback: Automated (snapshot available)</li></ul>
Owner: ops_team Requested by: orchestrator_pipeline
[APPROVE] [REJECT] [REQUEST MORE INFO]

## Audit Bundle (GPG Signature Verified)

```
$ curl -H "X-API-Key: $KEY" https://api.aelitium.eu/api/audit/bundle -o bundle.asc
$ gpg --verify bundle.asc
```

```
gpg: Signature made 2025-10-20 11:23:45 UTC
gpg:                using RSA key 8A7F3E92D1C4B5F6
gpg: Good signature from "AELITIUM Proof System <proof@aelitium.eu>"
```

Primary key fingerprint: 8A7F 3E92 D1C4 B5F6 2E8A 9C3D 7B4F 1A6E 5D9C 0F2B

**Bundle Contents:** - Full job execution trace (timestamps, exit codes, outputs) - Policy evaluation results (PRAGMA compliance) - Steward approval record (who, when, why) - Metrics snapshot (Prometheus queries at incident time) - SHA-256 hashes of all artifacts

---

## 4. Outcomes

### For Operations Teams

▣ **MTTR ▣ 40%** — Automated diagnostics + repair pipelines ▣ **Zero manual toil** — Agents handle 80% of P2/P3 incidents ▣ **Full observability** — Prometheus + Grafana integration

## For Compliance Officers

□ **EU AI Act ready** — Complete decision audit trail □ **Human oversight** — Steward approvals for high-risk actions □ **Cryptographic proof** — GPG-signed evidence bundles

## For CTOs/CIOs

□ **Risk** □ — No more “black box” AI decisions □ **Trust** □ — Explainable agent behavior □ **ROI** — €200k+/year saved on incident response + compliance prep

---

## 5. Implementation & Next Steps

### Technology Stack

Backend: FastAPI + Python 3.12 + Uvicorn  
Frontend: React 19 + Vite + Tailwind CSS  
Monitoring: Prometheus + Grafana + Loki + Blackbox Exporter  
Security: GPG signing, RBAC (X-API-Key/JWT), CSP headers  
Deploy: systemd + Cloudflare Tunnel (TLS termination)

### Current Status

- □ **18 routers / 60 API endpoints** live in production
- □ **202 tests passing** (89% coverage)
- □ **Zero critical vulnerabilities** (pip-audit + bandit)
- □ **Production domains:** api.aelitium.eu, app.aelitium.eu

### Immediate Roadmap (Q4 2025)

**P1: Enhanced Compliance** - Compliance Pack (detailed JSON + PDF reports) - SSE Heartbeats (real-time agent status streaming) - Grounded Mode (deterministic, non-stochastic execution)

**P2: Enterprise Features** - SSO (SAML/OAuth) integration - Custom agent policies per tenant - Advanced RBAC (role-based access control)

---

## 6. Pricing

### Pro (SaaS)

**€5,000–8,000/month** per team (up to 25 users)

Includes: - All executive agents ( $\Sigma$ -CTO,  $\Omega$ -OPS,  $\Phi$ -SEC) - Unlimited orchestrator pipelines - GPG-signed audit trails - Stewards approval workflows - Grafana/PagerDuty integrations - Email support (24h SLA)

## Enterprise (On-Premises / VPC)

**From €150,000/year** (annual contracts)

Includes: - Dedicated deployment (AWS/GCP/Azure/on-prem) - SSO integration (SAML, OAuth, LDAP) - Custom agents + compliance policies - 24/7 SLA with dedicated support - Training + onboarding workshops - Quarterly business reviews

## Proof of Value

**14-day trial** with simulated incidents + compliance report (no credit card required)

---
